## **DETAILED ACTION**

### ***Response to Amendment***

The Amendment, filed on October 25, 2004, has been entered and acknowledged by the Examiner.

Claims 1-10 are pending in the instant application.

### ***Allowable Subject Matter***

Claims 1-10 are allowed over the prior art of record.

The closest prior art of record, Linghart et al. (US 6,509,679), teaches the combination of the shadow mask and the insert member as an integral one-piece structure, thus, fails to disclose an insert member having a thickness which is greater than a thickness of the tension mask. The prior art references of record fail to teach or suggest an obvious motivation to combine or modify the Linghart reference to produce the claimed invention.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitation of an insert member formed of a material having a second coefficient of thermal expansion and a thickness which is greater than a thickness of the tension mask, the insert member having a plurality of apertures positioned along the length of the insert member and a mask receiving edge to which the tension mask is applied.

Regarding claims 2-8, claims 2-8 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 9, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 9, and specifically comprising the limitation of insert member connected to the support blade structure at a generally central location of the insert member, the insert member being formed of a material having a thickness which is greater than a thickness of the tension mask and further comprising plurality of apertures extending along its length and a mask receiving edge to which the tension mask is applied.

Regarding claim 10, claim 10 is allowable for the reasons given in claim 9 because of its dependency status from claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
